

Physical Activity Readiness Questionnaire (PAR-Q)

The PAR-Q is a simple but valuable screening tool used to identify individuals who should not be tested in this field setting without a physician's clearance. This PAR-Q has been used in Canada and throughout North America. Proceed with caution if the individual says "yes" to one or more questions. In general, a "yes" answer may require written physician clearance before the client may undergo fitness testing.

Yes

No
